

## **Environmental Report to TABS AGM 2024**

TABS continues to work with the Parish Council to help update maintenance schedules for care of our grass verges, greens, footpaths, jitties, hedges and trees. It was discovered that working maps and schedules were in disarray partly because of the dwindling resources of our District and County authorities. Work continues on establishing an efficient system.

Also, TABS is supporting the Parish Council's efforts to repair, clean and generally revamp the village seats.

TABS supports any planting that will improve the look of an area. The Society successfully organised further planting on Telford Way Green, thanks to the donation of shrubs by Coles Nursery and Parish Council grants.

Improving the chances for nature has to begin in our own parish.
