

Environmental Report to TABS AGM 2023

The main objective this year was to improve the care and maintenance of our public spaces. This entailed establishing with our District and County authorities who owned what and the maintenance schedules for them. Working with the Parish Council the maps have been revised and maintenance schedules reviewed and anomalies exposed which are still in the process of being addressed.

TABS has continued to maintain the pond on Manor Field and the newly planted circles on Telford Way Green. The pond is currently looking normal with water actually in it, but it is currently plagued with blanket weed. The newly planted bushes on Telford Way Green have had a difficult first year with the drought and very hot spell. However, some are flourishing but others may have been lost which will be confirmed with the contractor at the end of the month.

Also, at Telford Way tree work on the embankments by the County Council is awaited, and repair of the steps down to Willowbrook Park at the west end.

TABS strongly believes that care and enhancement of the environment begins in our own surroundings and will continue to make that happen.
